PROFILE

A Bachelor of Science in Information Technology graduate from KCA University with an encouraging academic achievement and work experience. Possess leadership and communication skills. Keen to pursue a career in IT specializing in web development and Database management. I apart from that I can handle any emerging technical issues in computing.

EDUCATION

KCA University: **2018-2021**

Bachelor of Science in Information
Technology *Grade*: 2nd class Upper

Key Modules: Software Development, networking and Database management

J.G Kiereini High School: **2014-2017**

Subjects: Maths (A), Computer Studies (A), Physics (B), English (C+)

EXPERIENCE

COSEKE: **2022 Jan-May**

Software development-EDMS

I in collaboration with senior developers developed electronic database management systems for companies such as: UWS and Kengen

Safetrac: **2023 Feb-June**

Car Tracking

My duties involved checking car fuel, duration taken since the start of the journey, addressing issues encountered by drivers while on journey and Sending reports of the cars tracked on a particular day.
We conducted the services for firms such as BOLORE, UNILEVER, Kenya Breweries etc.

UPWORK (Freelancing Platform)

Web development

I have managed to develop personal websites for quite a number of clients.
I also integrated PayPal payment system to a client Ecommerce app.

VOLUNTEERING

KCA University**: *2020 may-July   University Elections***

- Was among the team of developers that developed the election system
- This improved my software development skills and cooperation skills with team members

ACHIEVEMENTS

- By designing the Election system at KCA, we cut the cost that was to be invested by contracting it to outside companies by 60%.

- Winner of '*Best project*'-2020 in BSCIT at KCA University.

- During my time at COSEKE, I in collaboration with senior developers managed to develop EDMS systems for United Women Sacco (UWS) and KENGEN limited.

- As a freelancer, I have managed to develop personal websites for quite a number of clients. I have also worked with Apis such as weather Update Apis as well as using Django framework as a backend to my apps.

SKILLS

Python: Django framework
PHP: Laravel framework
JavaScript: ReactJs Framework
UI Development: HTML, CSS, Bootstrap
UI Design: Figma
Databases: MYSQL

HOBBIES & INTERESTS

1.Technology
I like researching on the advancements in IT fields e.g., new programming languages/frameworks, upcoming features in database management software to be up to date with efficient problem-solving skills.

Achievement

This improves my problem analysis technique and boosts my problem-solving ability.

2.Psychology
Socializing with different types of people with an aim of understanding their interests how they like to conduct their activities.

Achievement

This helps me understand different clients' needs as well as creating good work relations with my colleagues.
